---

In presenting our Autumn Catalogue we wish to thank our customers for their kind patronage during the past season and solicit their continuance in the future.

**Quality of Bulbs.** We procure our stock direct from the best growers in this country, Holland, France and Japan, always purchasing *first quality bulbs* which are sure of giving success.

**Bulbs by Mail.** We deliver bulbs at single and dozen rates free by mail except where special mention is made in our catalogue.

**City Delivery.** All prices in this catalogue include free delivery within the city limits.

**Early Orders** are always advisable as our stock of many varieties is liable to be exhausted early and many times good stocks are not obtainable later.

**Location of Store.** Our store will be found on the northwest corner of Washington and Eddy Streets, one block from Dorrance or Westminster streets, and within a short distance of the Union Railroad Station.

## Hyacinths

These are exceedingly popular bulbs on account of the ease with which they are cultivated, their varied colors, beauty and fragrance.

**CULTURE IN POTS.**—Select solid bulbs without regard to size for this purpose, and place a single bulb in a five-inch pot filled with any good potting soil; a light, rich soil is preferable; and place the bulb in firmly but do not have the soil hard beneath it. After potting give them a good watering and set away in some cool, dark place, and cover six or eight inches with soil or cocoanut fiber. Leave in this condition until well rooted, and then for a succession of blooms, bring to the light at intervals of two weeks, and shade from the sun for a few days.

**CULTURE IN GLASSES.**—The single varieties are better adapted for glass culture than the double, and the best-named sorts should be selected. Soft water should be used in filling the glasses, a little charcoal put in, and the bottom of the bulbs allowed to just come in contact with the water. They should then be put in a dark, cold place until the roots are four or five inches long, a little additional water occasionally as it evaporates, and then brought into light and warmth as directed for culture in pots.

**OUTDOOR CULTURE.**—The bulbs may be planted any time after the beginning of October and before the winter frost sets in. Any good, well-drained garden soil will answer. Dig deep and mix in a little decomposed manure; set the bulbs from three to four inches below the surface, and about six inches apart; after the ground becomes frozen, give a good covering of stable litter.

### Pino's Special Bedding and Forcing Hyacinths

Superior to mixed shades of Hyacinths. In the selection of this stock we have secured sorts that will bloom at one time and each shade is comprised of only one variety, insuring the effect desired. Single flowering varieties only. If by mail add 15c. per dozen postage.

## Single, Early Named Tulips

Of all bulbs grown, the Tulip is without doubt the most popular. It is hardy, easily grown and if cultivated properly, retains its peculiarity of marking for an indefinite period. Tulips require similar cultivation to Hyacinths, except they should not be planted so deep. Varieties marked "A" are the earliest and flower together, and those marked "B" follow, etc. The figures indicate the height attained in inches.

## Various Tulip Species

## Narcissus

The numerous varieties of Narcissus are very beautiful and are among the most popular of our flowering bulbs for both garden and house culture; the double and single varieties being perfectly hardy, are better suited for general out-door planting, and after once planted they may remain undisturbed for several years; but in time they will become so thick and matted together that resetting will be necessary. The Polyanthus varieties may be planted out if a good covering of leaves or litter is given them to exclude the frost, when they will make an excellent show in the spring, and will repay for any extra trouble. All the varieties are excellent for growing in the house, and with similar soil and treatment to that recommended for Hyacinths, very satisfactory results are sure to be obtained.

## Chinese Sacred Lily

The Chinese Narcissus is very easily grown. When grown in water, shallow dishes, about three inches deep, should be used, into which put about an inch of gravel; on this set the bulbs and fill in with small stones to keep them upright and keep the dish full of water.

**True Chinese Grown**, 10 cts. each; \$1.00 per doz. Original basket of 30 bulbs, \$2.00. Add 5 cts. each if sent by mail.

Pebbles for above, 10 cts. per quart.

CHINESE SACRED LILY

## Crocus

This favorite of the garden is one of the earliest to flower in spring, often displaying its bright and lovely blossoms early in March. Plant the bulbs two or three inches deep. They are hardy and may remain in the same ground undisturbed for many years.

## Lilies

No class of plants capable of being cultivated out-of-doors possesses so many charms as the lily. They are stately, elegant and beautiful and possess the most agreeable perfume for general effect, whether growing in the garden or house, they have no rivals. October and November are the best months for planting outside; the soil should be deep, rich and mellow, *with good drainage*. Do not put manure about the bulbs when setting, as it collects moisture and insects and often causes the bulb to decay. Top dressing is the better way to enrich the soil after the bulbs are set. The beds should be well covered with leaves and strawy manure to exclude the frost.

## Fertilizers

**Sheep Manure, Pulverized** This is a pure natural manure, and the most nutritious food for plants. It is excellent as a top dressing for lawns. There is nothing better for mixing with the soil for greenhouse plants; one part manure and six parts soil. It makes the richest, safest and quickest liquid manure. One pound to 5 gallons of water; 2 lb. package, 15c.; 5 lb., 25c.; 10 lb., 40c.; 50 lb., \$1.25; 100 lb., \$2.00.

**Lawn and Garden Dressing** This dressing is made from chemicals and is so prepared that it acts gradually throughout the season, producing a luxuriant growth of grass of a rich green color. It is far superior to stable manure, free from weed seeds and easily applied. For lawns apply at the rate of 400 pounds per acre. Per lb., 5c.; 25 lbs., \$1.00; 100 lbs., \$3.00.

**Unleached Hardwood Ashes** As a fertilizer for lawns, gardens and fruits, Hardwood Ashes are unequalled; they are not a mere stimulant, but supply natural plant food, permanently enriching the soil. They are exceedingly valuable for lawns, imparting a rich dark shade of green and destroying many of the insects which are so injurious. Price, 100 lb. bag, \$1.25.

**Bowker's Food for Flowers** A dressing made expressly for plants grown in the house, garden or conservatory. Clean, odorless and producing early and abundant blossoms, and healthy, luxuriant plants. Small packages, enough for thirty plants for three months, 15c. each. Large package, 25c.

**Pure Ground Bone Meal** This finely pulverized ground bone is excellent for rose culture; top dressing for lawns and potted plants. 5 lb. package, 25c.; 10 lb. package, 40c.; 100 lb. package, \$2.00.

**Nitrate of Soda** This is valuable solely for the nitrogen it contains, equal to 20 per cent of ammonia. It is chiefly a stimulant; it is used in addition to other fertilizers. 5 lb. 30c.; 10 lb. 50c.; 25 lb., \$1.25; 100 lb., \$4.00.

**Bon Arbor** A complete plant food, immediately soluble and applied directly to the root of all plants, giving a healthy lasting growth.  $\frac{1}{2}$  lb. 25c.; 1 lb. package, 50c.; 5 lb. can, \$2.00.

## Insecticides

**Aphine** A liquid spray for greenhouse and outdoor use, killing lice of every species.  $\frac{1}{2}$  pt. 40c.; pt. 65c.; qt. \$1.00; gal. \$2.50.

**Fir Tree Oil** One of the most reliable for red spiders, green, fly, mealy bug, caterpillars, slugs, blight, etc. Per pint, 75c.; qt. \$1.25; gal. \$4.00.

**Hellebore** Powdered White Hellebore for rose slugs, currant worms, etc. Dust on with gun or bellows while the foliage is moist. Per lb., 25c.

**Nikoteen** Is the cheapest, cleanest and most effective of insecticides and will not injure or discolor delicate plants. It is composed of that element in tobacco which gives it its value as an insecticide and nothing else. Trial bottle 40c.;  $\frac{1}{2}$  pint 75c.; pint \$1.50.

**Aphis Punk** A special preparation of nikoteen for the extermination of green and black fly, thrip, etc. Not injurious to delicate plants. Per package, 12 rolls, 60c.

**Neco-Fume** (Tobacco Paper) Can 24 sheets, 75c.; can, 1 gross, \$3.50; can, 2 gross, \$6.50.

**Neco-Fume** Liquid. Pint, \$1.50.

**Slug Shot** Destroys all insects injurious to house and garden plants, vegetables and fruits of all kinds; equals Paris Green when used liberally, without the danger from poison. Price 5 lb pkg. 30c.

**Sulphur, Flowers of** A staple preventive for the mildew on grapes, roses, etc. Lb. 10c.; 10 lb. 50c.

**Tobacco Stems for Fumigating** Clean and free from rubbish.

**Tobacco Dust** If dusted on while the foliage is moist, it destroys rose lice, cabbage and turnip fleas; etc. Spread upon the ground, it keeps off earth insects, and acts as a fertilizer. Per lb. 10c.; 2 lb., 15c.; 5 lbs., 30c.; 100 lbs., \$4.00.

**Tobacco Soap** Makes an excellent wash for plants and trees infested with green fly, lice and eggs of insects. Dissolve 2 oz. in gallon of water, pkt. 20c.

**Whale Oil Soap** Makes an excellent wash for trees and plants; kills insects and eggs on the bark. Per lb., 15c.

**Scalecide** The latest and best spray for San Jose Scale. A mechanical preparation of petroleum that instantly mixes with cold water. One gallon of Scalecide to 20 gallons of water sprayed on your trees and bushes will kill every scale that it reaches without injury to the tree or fruit bud if applied in late fall, winter or early spring while the foliage is off. Price, qt., 40c.; 1 gallon can, \$1.00; 5 gallon can, \$3.25; 10 gallon can, \$6.00; 50 gallon barrel, \$25.00

## **PARK LAWN GRASS MIXTURE**

In our lawn mixture we use only the highest quality, extra clean seed, and free from weed seeds which abound in inferior grades. We use only the choicest low growing grasses and a lawn produced from our seed will maintain a rich, dark, velvety appearance and a permanent sod.

1-2 lb. 20c.; 1 lb. 35c.; 2 lbs. 60c.; 100 lbs. \$25.00

1 lb. will sow 600 square feet

## **SHADY NOOK GRASS MIXTURE**

A special mixture of grasses adapted to growing under trees and in shady places where it is quite difficult to produce a satisfactory growth, 1 quart 30c.; 1-2 peck \$1.00; 1 peck \$1.75.

## **THE PREPARATION AND CARE OF A LAWN**

The ground must first be thoroughly prepared by draining, if necessary, and spade or plow to a depth of 6 to 12 inches, according to the nature of the soil, applying a liberal quantity of well decomposed manure, bone meal or pulverized sheep manure, the latter we recommend as being lasting in effect, not liable to burn the grass and free from weeds. Clean the ground thoroughly and rake perfectly smooth and level, as much of the success depends upon this part of the preparation. The seed should be sown on a calm day, that it may be applied evenly and at the rate of sixty-four pounds per acre, or one pound is sufficient for 600 square feet. After the seed is sown the ground should be rolled with a light roller or evenly tamped with the back of a spade. The plat should be mowed every ten days from May until September, using a sharp scythe in preference to a mower until a close turf is formed. Frequent mowing and rolling is necessary to maintain a close even turf. April and September are the best months for sowing lawn seed.

**PULVERIZED SHEEP MANURE**

Fig. 212  
Spraying Potatoes

THE AUTO-Spray No. 1 is used for spraying trees, shrubs, vines, greenhouses, poultry houses, hospitals and stables, for disinfectants for sheep and cattle d.p and cattle fly oil. It may be used where any other spray pump can be used, and will handle all spray solutions, including whitewash and cold water paint.

## How it Works

The AUTO-SPRAY No. 1 is operated by working an air pump by which air is compressed on top of the solution. After the pressure is generated the operator has nothing to do but direct the spray. A few strokes of the plunger will compress enough air to operate the machine several minutes, and two pumpings will discharge all of the contents.

## How it is Made

The AUTO-SPRAY No. 1 is made of heavy material throughout, and the brass machine which we *strongly recommend*, is practically indestructible because it cannot be affected by the various spray solutions. The construction throughout is thoroughly mechanical and so simple that it is not liable to get out of order. There are no screw connections, the pump is locked to the tank by a cam. Air tight and convenient. The pump is seamless brass, of extra large diameter, thus ensuring high pressure.

**EXTRA EQUIPMENT** is illustrated and priced on page 4.
